to. But, Cappel, as he goes to explain, that's questionable. "Because, according to research, the average adult, after 1 or 2 years, forgets an entire conversation and only remembers the gist," he says.

These observations suggest that the ability to learn about others is not a simple, unitary skill. It may be that different aspects of social cognition are involved in different types of social interaction. For example, the ability to learn about others may be important in the context of social interaction, but not in the context of social interaction. This is a possibility that needs to be explored in future research.

В 1912, когда вновь возник вопрос о реформах в Зап. Армении, партия Г. требовала создания автономии Армении под покровительством России.
