Plants were sown 2–3 cm, approximately, apart, except for a dense germination. Plants developed up to the appearance of the first significant roots, at the same time as the emergence of the first seedlings in the soil.

При оценке характера мартовского переворота в Баку необходимо в первую очередь ответить на следующие вопросы:

Strategic, administrative or financial issues have been raised, which require explanation. There is a need to explain comprehensively, in detail, to our officers the strategy and implementation of the strategy, as well as to ensure that the staff can understand the strategy. It is also important to ensure that the staff can understand the strategy. It is also important to ensure that the staff can understand the strategy.

Two groups of intermediate businesses prospered in the 1990s: general contractors and engineering or design firms. The first group owned a fairly significant amount of physical infrastructure, mostly bridges and roads, and the second group owned a significant amount of intellectual infrastructure, such as patents. Combined, the companies in these two groups own 600 patents. By 2000, the first group had more than doubled its

Stress, and not just from age or increased productivity, is the number one occupational health problem, which has up and down periods, spikes with individual variation, which is related with work-related exposure.

Важно отметить, что в Канаде в период существования нашей страны были такие люди, как, например, ее основатель и первый премьер Уильям Лойд Гибсон, которые в своем сердце и уме, несмотря на то, что принадлежали к империалистическому лагерю, понимали и признавали, что империализм не только не приносит и не приносит пользы своему народу, но и приносит вред другим народам, включая и население в этой области. Благодаря этим людям, которые в то время принадлежали к империалистическому лагерю, мы смогли избежать многих бед.

These different subgroups were compared, and a highly significant intergroup difference was found. The intergroup comparison was repeated using the 100-item version of the questionnaire, and the same pattern of results was obtained.
