These results are consistent with the hypothesis that the more information is available to the user, the more likely they are to use the system. The results also suggest that the more information is available to the user, the more likely they are to use the system.

[illegible][illegible]

It should be noted that it may not be appropriate to use negative, unproductive and even boring, experiences to reward or punish the development of managers, who perceive that the experience will, after some past time investment, be a reward in their own right rather than a punishment and a time loss.

My work within a feminist, a poststructuralist & Topical Discourse as well as the other conceptual approaches (e.g. Deleuze, Derrida, Foucault, Lacan, Lyotard, Žižek, etc.) has been to explore the ways in which the discursive and the material are intertwined in the construction of the subject. The discursive and the material are not separate entities, but they are intertwined in the construction of the subject. The discursive and the material are not separate entities, but they are intertwined in the construction of the subject. The discursive and the material are not separate entities, but they are intertwined in the construction of the subject.
